

Service design (50 marks)

Project Title: Trailblazer Design Studio

ProblemArea - "Design, map, and scale a dream business venture."

This could be entirely your choice of service

Options could be

Coffee shop

Courier service

A Smart bin–new product/any sustainable product.

The goal is to first establish a viable concept and its supporting service structure.

The current state blueprint can be based on an existing enterprise - visually documenting the journey through a

- Start up road map–mapping all stakeholders involved in the service,and describing the whole eco system.
- Current state Blueprint (detailing existing actions and touchpoints)
- Journey map/empathy map of user interaction with service
- A value proportion canvas
- Future state Blueprint (forecasting strategic expansion and long-term business evolution).

Deliverables

It is advised to use Canva/Miro as they have set templates for service design

Project task1(10 marks)

"Define the Problem Space." This requires executing User Interviews and Stakeholder Mapping to analyze the existing service ecosystem.. The entire effort must converge on a crystal-clear, concise Problem Statement.

- Start up road map–mapping all stakeholders involved in the service,and describing the whole eco system.
- Problem statement

Project task 2 (10 marks)

" Current state blueprint Blueprint The primary goal is to design the service's operational

flow using a detailed Service Blueprint. This requires defining the entire system—from what the customer sees (Frontstage) to the required internal support (Backstage activities, channels, and processes). Journey maps and empathy maps

- Current state blueprint
- Journey maps/empathy maps
- Final problem statement

Project task 3 (10 marks)

Value proportion canvas—Use analysis and creative iteration to refine the core value propositions and produce a tangible Prototyped Service Concept for testing.

- Value proportion canvas

The Value Proposition Canvas in service design aligns the user's experiential journey with a service's functional touchpoints. By mapping a customer's jobs, pains, and gains against a service's specific relievers and creators, designers can bridge the gap between user expectations and service delivery. This ensures that every interaction—whether digital or physical—directly addresses user friction and amplifies emotional value, resulting in a cohesive "fit" where the intangible service effectively solves real-world needs.

Project task 4 (10 marks)

Create a Future state Blueprint (forecasting strategic expansion and long-term business evolution).

Visually represent the service using low-to-mid-fidelity prototypes of key elements (e.g., app screens, customer handouts, or in-person interactions)-journey maps/empathy maps
Supplement this with a clear write-up detailing the integration of prototype testing with users Feedback, insights, and iteration decisions. Use analysis and creative iteration to refine the core value propositions and produce a tangible Prototyped Service Concept for testing.

- Future state blueprint

Project task 5 (10 marks)

Create a High-Impact, Comprehensive Service Concept Presentation." The final deliverable is an effective pitch that showcases the entire development process—from foundational Research (User Studies, Needs/Pain Points) and strategic Mapping (Stakeholder/Journey Maps) to the final Service Blueprint and Wireframes/Prototypes (low-to-mid-fidelity).

- Future state blueprint

Submission guidelines - A pdf document with not less than 500 words .A power point presentation describing the journey,current state blueprint and final value proposition in a future state blueprint.

Project: Task 1 (10 marks)					
Criteria	10	8	6	2	0
Criteria 1(10 marks) Problem statement , Mapping the existing Service design ecosystem map with all stakeholders,co-creators Problem statement	Great clarity and articulation of problem statement and comprehensive roadmap describing the entire ecosystem	Good clarity and articulation of problem statement and comprehensive roadmap describing the entire ecosystem	Fair clarity and articulation of problem statement and comprehensive roadmap describing the entire ecosystem	poor clarity and articulation of problem statement and comprehensive roadmap describing the entire ecosystem	Not submitted/ Absent

Project:-Task 2 (10 marks)					
Criteria	10	8	6	2	0
Criteria 1(10marks) Current ,state blueprint with all stakeholders,co-creators,fro nt and backstage actions,journey,empathy maps and user personas	Great clarity,Concise,co mprehensive mapping of current state blueprint	Good clarity,Concise,co mprehensive mapping of current state blueprint	Fair mapping of current state blueprint	poor , mapping of current state blueprint	Not submitted/ Absent

Project :Task 3 (10 marks)					
Criteria	15	10	8	2	0
Criteria 1(10 marks) Value proposition canvas–with creative concepts,wire frame models,usability testing	Great clarity and Comprehensive value added canvas proposition,mapp ing,wire frame	Good Clarity of valueproposition canvas,,mapping, wire frame models,usability testing	Fair Clarity of value proposition canvas,mapping,, wire frame models,usability testing,	Poor Clarity of value proposition canvas,mapping,,wire frame models,usability testing,	Not submitted/ Absent

	models,usability testing,				
--	---------------------------	--	--	--	--

Project: Task 4 (10 marks)					
Criteria	10	8	6	2	0
Criteria 1(10 marks) Future state blueprint with final proposed concepts	Comprehensive mapping and detailing,mid fidelity wireframes/models/prototype	Good and Comprehensive mapping and detailing,mid fidelity wireframes/models/prototype	Fair and Comprehensive mapping and detailing,mid fidelity wireframes/models/prototype	Poor mapping and detailing,	Not submitted/ Absent

Project: Task 5 (10 marks)					
Criteria	10		8	2	0
Criteria 1(10 marks) Communication and presentation with process documents and presentation of final concept model	Great communication of concepts and sequential manner of presentation	Good clarity of communication and presentation	Fair communication and presentation	poor communication and presentation	Not submitted/ Absent
